

New Construction

Air West has an excellent track record in new construction HVAC work. In the planning stage, our engineering department uses the best engineering practices to assure that systems are properly sized and duct systems are designed with comfort and energy efficiency in mind. Our installation department uses only quality materials and the best equipment combined with professional workmanship to provide total customer satisfaction..

It all began with Ultimar I, our first big project in 1990. This 22 story high rise condominium building on Sand Key, just south of Clearwater Beach, set the standard for our company. Years later, a very high percentage of the Rheem heat pump systems that we installed are still running nicely. The builders were so happy with our work that we were hired to handle the HVAC work for Ultimar II and Ultimar III in the following years.

More recent, similar projects include several high end, high rise condominium buildings such as Bella Marguerite, Bella Rosa, Harborview Grande, Island Key, La Contessa, Palazzo Del Mare and La Vistana. Our next big project of this type is Las Palmas in Redington Shores, a multiple building, high rise condominium complex.

Air West has also done many other types of projects such as Post Offices (Tarpon Springs, Spring Hill, Lutz, Tampa, Valrico, Bartow and many, many more), Schools (Pinellas Park Middle School, Lealman Elementary), Restaurants (The Dish, Durango's in Bonita Springs), Office/Retail Centers (Coastal Pasco Partners of New Port Richey, La Concha Plaza, Bay Walk) and Malls (Elizabeth Arden, White House-Black Market, Ann Fontain) just to name a few.

We are extremely proud of our work in new construction single family homes as well. We've done houses from 1,200 square feet to 10,000 square feet with high quality design, materials and installation at competitive prices.

Adding an addition to your existing home? We will make recommendations that will save you money and provide a level of comfort and efficiency second to none.

Can Air West handle anything when it comes to new construction? Absolutely! More important, we will do it the right way and always stand behind our work. Our promise to you is "We will impress you."
